PROFESSIONAL SUMMARY

Detail-oriented and motivated aspiring Data Analyst with hands-on experience in Python, SQL, Excel, Power BI, and Tableau. Skilled in data cleaning, exploratory data analysis, dashboard creation, and transforming raw data into meaningful business insights. Passionate about analytics and problem-solving with strong communication and teamwork abilities.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy), SQL (MySQL)

Visualization & BI Tools: Microsoft Excel, Power BI, Tableau

Development Environments: Jupyter Notebook, VS Code

Core Competencies: Data Cleaning & Validation, Exploratory Data Analysis (EDA), Dashboard Development, Data Transformation, Reporting & Business Insights, Joins & Aggregations

PROJECTS

Crime Data Analysis | Python (Jupyter Notebook)

- Cleaned and analyzed crime datasets using Pandas and NumPy to identify crime trends, hotspot areas, and patterns through exploratory data analysis.
- Developed visual reports and analytical summaries that transformed raw crime data into actionable insights to support data-driven decision-making.

Retail Data Analysis | Microsoft Excel

- Analyzed retail sales and customer purchasing data using Pivot Tables, charts, and formulas to identify sales trends, KPIs, and product performance.
- Generated structured business insights through data cleaning and reporting, improving overall accuracy of sales analysis and strategic planning.

Store Sales Analysis | MySQL

- Designed SQL queries using joins, aggregations, and filtering to analyze store sales datasets and identify revenue patterns, customer behavior, and top products.
- Generated structured reports from relational databases to support data-driven decision-making and drive actionable business insights.

Customer Churn Analysis | Power BI

- Built interactive Power BI dashboards to analyze customer churn trends, retention metrics, and at-risk segments using advanced visual analytics techniques.
- Cleaned and transformed datasets using Power Query to generate actionable insights supporting customer retention strategies and business growth.

Hazard & Inspection Analysis | Tableau

- Developed interactive Tableau dashboards to visualize hazard reports, safety trends, risk patterns, and inspection performance metrics.
- Applied data storytelling techniques to present complex inspection data in a clear, business-friendly format for stakeholders and decision-makers.

EDUCATION

Bachelor of Science in Mathematics | University of Calicut | 2025

Diploma in Data Analytics with Python | OFSYS Education

ADDITIONAL INFORMATION

Languages: English (Proficient), Malayalam (Native)

Interests: Data Analytics, Business Intelligence, Data Visualization, Continuous Learning
