PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in data cleaning, exploratory data analysis, SQL querying, and interactive dashboard development. Proficient in Python, MySQL, Excel, Power BI, and Tableau. Adept at transforming raw datasets into actionable business insights through KPI reporting, trend analysis, and data visualization. Eager to apply strong analytical and technical skills in an entry-level Data Analyst role.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy, Matplotlib) | SQL

Databases: MySQL

Visualization & BI Tools: Microsoft Excel | Power BI | Tableau

Development Tools: Jupyter Notebook | VS Code | GitHub

Core Analytics Skills: Data Cleaning & Transformation | EDA | Dashboard Development | KPI Reporting | Data Visualization | Trend Analysis | SQL Joins & Aggregations | Business Insights

PROJECTS

Crime Data Analysis | Python | Pandas | NumPy | Jupyter Notebook

- Performed EDA on crime datasets to uncover frequency trends, hotspot regions, and category-wise patterns; cleaned data by resolving missing values, duplicates, and format inconsistencies.
- Generated analytical summaries and visual reports to communicate data-driven insights and support evidence-based interpretation of crime statistics.

Retail Sales Analysis | Microsoft Excel

- Analyzed retail sales data using Pivot Tables, advanced formulas, and conditional formatting to identify top-performing products, sales trends, and customer purchasing behavior.
- Delivered KPI reporting and structured business insights through data cleaning and dashboard-style Excel views, improving reporting accuracy and decision-making.

Store Sales Analysis | MySQL

- Wrote optimized SQL queries using joins, aggregations, GROUP BY, subqueries, and filtering to analyze sales performance, customer behavior, and revenue trends across relational datasets.
- Produced structured analytical reports extracting actionable business insights and demonstrating strong relational database and reporting workflow proficiency.

Customer Churn Analysis | Power BI

- Built interactive Power BI dashboards to analyze churn patterns, retention metrics, and at-risk segments; leveraged Power Query for data cleaning, transformation, and preprocessing.
- Designed KPI cards, charts, slicers, and dynamic filters to deliver business-focused customer retention insights for stakeholder reporting.

Hazard & Inspection Analysis | Tableau

- Developed interactive Tableau dashboards to visualize hazard reports, inspection performance metrics, and safety risk trends using data storytelling and structured dataset analysis.
- Designed multi-view layouts with charts, filters, and interactive elements to present inspection insights in a clear, business-accessible format.

EDUCATION

Bachelor of Science in Mathematics | University of Calicut | 2025

Diploma in Data Analytics with Python | OFSYS Education
