PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on project and internship experience in data cleaning, ETL, data validation, exploratory data analysis, statistical analysis, SQL querying, and interactive dashboard development. Proficient in Python, MySQL, Excel (including Power Query), Power BI, and Tableau. Adept at transforming raw datasets into actionable business insights through KPI reporting, trend analysis, and data visualization.

ACADEMIC PROJECTS

Crime Data Analysis

2025

Python, Pandas, NumPy, Jupyter Notebook

- Performed EDA and statistical analysis using Python (Pandas, NumPy) on a 6,481-record crime dataset, cleaning missing values, duplicates, and format inconsistencies through structured data validation.
- Identified frequency trends, hotspot regions, and category-wise patterns, translating findings into analytical summaries and visual reports for evidence-based interpretation of crime statistics.

Retail Sales Analysis

2025

Microsoft Excel

- Analyzed 16,384 records of retail sales data (2023–2024) using Pivot Tables, Power Query, advanced formulas, and conditional formatting to identify top-performing products, sales trends, and customer purchasing behavior.
- Delivered KPI reporting and structured business insights through data cleaning and dashboard-style Excel views, improving reporting accuracy and decision-making.

Store Sales Analysis

2025

MySQL

- Wrote 20+ optimized SQL queries — joins, aggregations, GROUP BY, subqueries, and filtering — on a structured sales database to analyze sales performance, customer behavior, and revenue trends.
- Produced structured analytical reports translating query results into actionable business insights, demonstrating strong relational database and reporting workflow proficiency.

Customer Churn Prediction & LTV Engine

2026

Python, Scikit-learn, FastAPI, Power BI

- Built and deployed a Customer Churn Prediction & LTV Engine using Python (Scikit-learn) and FastAPI, segmenting customers by lifetime value and visualizing churn drivers on a 4-page Power BI dashboard.

Hazard & Inspection Analysis

2026

Tableau

- Developed an interactive Tableau dashboard with KPI cards, slicers, and dynamic filters to surface hazard reports, inspection metrics, and safety risk trends for stakeholder reporting.

INTERNSHIP

Data Analytics Intern — Zaalima Development Pvt. Ltd.

May 2026 – Jul 2026

- Cleaned, transformed, and analyzed datasets using Python and Excel (Power Query) as part of a structured two-month training program with IntelleQA Cademy.
- Built dashboard components in Power BI to support data-driven reporting during the internship.

TECHNICAL SKILLS

- | | |
|------------------------------------|---|
| • Python for Data Analytics | • Business Insights Reporting |
| • SQL and MySQL Querying | • Microsoft Excel Analytics (Power Query) |
| • Data Cleaning and Transformation | • Power BI Reporting |
| • ETL and Data Validation | • Tableau Dashboarding |

- Exploratory Data Analysis (EDA)
- Statistical Analysis
- Dashboard Development
- KPI Reporting and Tracking
- Data Visualization
- Trend Analysis
- SQL Joins and Aggregations
- Pandas, NumPy and Matplotlib
- Machine Learning Basics (Scikit-learn)
- Jupyter Notebook
- VS Code
- GitHub
- Git & Version Control

EDUCATION

- **Bachelor of Science in Mathematics** — University of Calicut, Kerala, India — Sept 2022 – April 2025
- **Diploma in Data Analytics with Python** — OFSYS Education

CERTIFICATIONS

- IBM Certification in Data Analytics
- Data Analytics Certification — Zaalima Learnings
- Certificate of Internship & Training in Data Analytics — Zaalima Development Pvt. Ltd. (25 May 2026 – 25 Jul 2026)

LANGUAGES

English, Malayalam, Hindi
